

BAYINFOTECH

TRUSTED PARTNER FOR YOUR CLOUD JOURNEY

February 2019 Tech Info

We begin each year with hopes of change and prosperity. In that theme we've started a monthly newsletter to feature some of the latest at BayInfotech.

In the Community 2018

Take a look at all the opportunities we had to give back to our local community in the past year. BayInfotech is grateful to be able to help out in the Bay Area. We are excited for the plans to continue to share in 2019.

Cisco SD-WAN Enablement Workshop

This January, BayInfotech enabled Cisco's Partner on SD-WAN Technology for the Demand Generation. This onsite workshop was led by an instructor. The emphasis was on fundamentals, SD-WAN components, deployment use cases, and operating a secure extensible network. Now, the Partner understands the value proposition of the Cisco's SD-WAN technologies. Overall this leads to identifying and driving more opportunities.

Coming Soon: DNAC Labs

The future of the network is Intent Based Networking. BayInfotech is launching soon, DNAC training labs available to our Cisco Partners and Customers. This lab will demonstrate the value of Cisco SD-Access & Assurance apps using specific equipment and configuration. Different use cases will highlight, how Cisco DNAC and SD-Access can simplify the enterprise campus/branch environments, increase network security and scale network resources with growing needs.

Meaningful Work Fundraiser

Join **BayInfotech** with **LoveNeverFails** on **2/23/19** in Danville for an evening celebrating business partnerships in the fight against human

trafficking.

Event includes dinner, refreshments, entertainment and auction. **Speakers at the event will include:**

Vanessa Russell LNF Founder and Executive Director

Nirav Sheth Vice President, Partner Solutions, Architectures and Engineering, Global Partner Organization, Cisco

Tish a LNF Survivor Leader and Program Graduate

All proceeds go to support survivors of human trafficking and at-risk young adults

AI: the way to revolutionary technology

Artificial Intelligence or AI is a branch of Computer Science that's used for inventing cutting edge smart machines that can think and work just like humans. Learn more about Artificial Intelligence, smart machines, and the benefits they bring to technology.
